SINO SDS2-3VA 3-Axi
With KA300 Linear Sc
Lathes And Milling Ma

Brand Name:	SINO
Model Number:	SDS2-3
MOQ:	1 PC
Price:	Negotial
Packaging Details:	Carton
Payment Terms:	T/T, L/C

Detail Information

Place Of Origin:	Guangzhou, CHINA	Certification:	CE,RoHS
Name:	SINO SDS2-3VA 3 Axis Digital Readout System For Milling Lathe KA300-70mm Linear Scale Optical Encoder	Number Of Axis:	3 Linear S DRO Syst
Color:	Grey/Black-Colors	Signal:	TTL / RS4
Voltage:	AC100-240V / 50-60Hz	Suitable For:	Grinding M
Resolution:	1um,5um,0.5um	Material:	Metal
Supply Ability:	12000 Pcs Per Month		
Highlight:	3-axis digital readout system for lathes, SINO DRO system with optical e KA300 linear		

Product Description

SINO SDS2-3VA 3-Axis Digital Readout System with KA300 Linear Scale Optical Encoder for Lathes and

LCD Display: The digital readout unit is equipped with a user-friendly LCD display, providing clear and accurate numerical readi operation.
SDS2-3VA Digital Readout: The SDS2-3VA digital readout unit ensures precise and reliable measurements of machine axis pos milling and lathe applications.
KA300-70mm Linear Scale Optical Encoder: The KA300-70mm linear scale optical encoder is designed for durability, offering e factors, ensuring reliable position feedback even in demanding conditions.
Three-Axis Measurement: The system supports three axes (X, Y, Z), enabling simultaneous measurement and monitoring of ma operational efficiency.
Easy Installation: The system is designed for quick and straightforward installation on milling and lathe machines, ensuring sear without hassle.

Suitable Applications:

Milling Machines: The 3-axis digital readout system is ideal for milling machines, offering essential measurement feedback for p operations.
Lathe Machines: The system is also perfect for lathe machines, ensuring accurate positioning of cutting tools and workpieces fo
Precision Engineering: Industries like aerospace, automotive, and tool manufacturing can benefit from the high accuracy and re enhancing precision in their operations.

Advantages

Supports Five Languages: The system supports French, German, Spanish, English, and Chinese, ensuring accessibility for use
User-Friendly Interface: The system offers a basic and easy-to-navigate design, making it accessible for users of all experience
Large, High-Resolution LCD Screen: The system features a large, highly clear LCD screen for easy readability and better visibil
Compatibility: The DRO is fully compatible with all Chinese-made linear scales, providing versatility and broad application.

SDS2-3VA LCD DRO Features:

Common Applications: Frequently used in lathe, drilling, boring, and milling machines, the LCD display is compatible with all Ch ensuring wide compatibility.
Language Flexibility: This feature is especially beneficial for users of milling machines and lathes from various countries, as the Chinese and English on a single display.

Assessment of the SDS2-3VA Model:
Input Voltage: AC 80-240V
Signal Input: TTL signal input for precise measurement
Material: Durable plastic cover for long-lasting use
Plug Options: Available with AU, EU, US, UK plugs, and more
Specifications of SINO SDS2-3VA digital readout system + linear scale encoder

The SDS2-3VA is a high-performance, versatile display console, designed for use with milling, lathe, and grinding machines.
It supports up to three linear encoders in this three-axis configuration. Additional interfaces are available to combine axes or adj equipment from other manufacturers. Please refer to the encoder compatibility guide below for more details.
The system features a robust die-cast housing with a durable, tactile front-panel membrane, ensuring long-lasting performance.
A large LCD panel provides excellent readability, enhancing ease of use.
Key features include:
PCD (Point on Circle)
Hole patterns
200 zero memory settings
Radius/diameter display
Tool offsets

Packaging List :

1 PC	3 Axis LED digital readout SDS2-3Va
1 PC	Protection cover
1 PC	Instruction Manual (English)
1 PC	Cable
